

Abhay Rohit

Senior Frontend Engineer

hello@abhayrohit.com | abhayrohit.com | linkedin.com/in/abhayrohit | github.com/blitzve0

Indore, India | Available immediately | Remote / hybrid India

US and UK time-zone experience

Summary

Senior Frontend Engineer with 6+ years building React, Next.js and TypeScript products. Combines frontend architecture, accessible UI and production support across healthcare and commerce workflows with agency design experience. Awwwards Jury Member 2026.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Sass, REST APIs, server-side rendering, web performance

Quality and platform: Playwright, Cucumber, Node.js unit and SSR tests, Sentry, CI/CD, AWS, Strapi, PostgreSQL

UI engineering: Figma, design systems, reusable React components, CSS tokens, accessibility, GSAP, Three.js/WebGL

Professional Experience

Senior Frontend Engineer (Contract) | Wisp

Remote from India | January 2026 - July 2026

Continued from TBD Health following its acquisition by Wisp in January 2026.

- Led frontend-domain knowledge transfer, documenting architecture, product behavior, integrations, deployment workflows and operating procedures for the acquisition transition.
- Delivered route preservation, 301 redirects and login handoff for customer and partner journeys; coordinated technical questions across Wisp and TBD teams.

Sole Frontend Engineer (Contract) | TBD Health

Remote from India | November 2022 - January 2026

- Owned frontend architecture and delivery across five applications, including tbd.health, patient and clinician portals, and Strapi CMS; carried Figma or self-authored designs through implementation, testing, release and long-term maintenance.
- Made frontend architecture and technology decisions, reviewed code almost daily, and coordinated delivery constraints with 3-4 backend engineers, product, clinical operations and the CTO.
- Rebuilt checkout as a single-page flow with Stripe saved cards, PayPal subscriptions and Square, adding payment-failure recovery and retry handling for order confirmation.
- Built booking, secure messaging, laboratory-result, prescription, registration and consent workflows; integrated diagnostics, telemedicine, e-prescribing and analytics services with cross-functional teams.
- Established Playwright/Cucumber end-to-end tests and Sentry monitoring, automated deployments, and supported launches and production incidents.
- Led Strapi 4-to-5 and SQLite-to-PostgreSQL migration work alongside Next.js, React and AWS Amplify upgrades while maintaining production continuity; contributed to Java/Spring Boot APIs.
- Handled routine AWS operations across DynamoDB, Cognito, Amplify and Secrets Manager; delivered HIPAA/PHI-aware access controls, data redaction and security hardening.

Co-Founder and Design Engineer | Haspr

Sagar, India | September 2019 - December 2022

Five-person design and development agency serving Indian and international clients.

- Led frontend engineering and UI/UX from discovery and Figma prototypes through responsive production delivery; mentored interns and worked across client communication, product strategy and project planning.
- Designed and built the award-recognized Haspr agency portfolio with Next.js, Sass, GSAP, Three.js/WebGL, Canvas and Lottie.
- Delivered interfaces for school-bus tracking, hiring and vehicle-service operations; authored and published reusable browser-interaction and React Native offline-database packages.

Selected Engineering Projects

000h by Cojeev Component Library Contributions

React, TypeScript, registry delivery and consumer verification | Contributor | [Registry delivery contribution](#)

- Contributed import-graph registry payload splitting, delivery-budget checks and Next.js/Vite consumer verification to the library built by Sanjay Kumar Gautam.
- Contributed appearance reliability work and first-paint, hydration, cross-tab and metadata regression checks.

0dB Meter Contribution

React, TypeScript, CSS | October 2026 | Merged pull request | github.com/luv-eri/0dB/pull/4

- Contributed a native accessible Meter with shared tokens, RTL and reduced-motion support; added nine unit/SSR regression tests for boundaries, invalid inputs, descriptions and formatting.

Human Reviewed Job Search Tool

Node.js, JavaScript, local HTTP API | Private working project | [Public case study](#)

- Built a local review workspace for public-board discovery, evidence-led India eligibility and explainable application-form preflight, with regression tests for source policy and lifecycle rules.
- Implemented source-backed answer preparation, validation, deduplication and local audit records; kept final application review and submission manual.

Open Source and Recognition

haspr-cursor: Published browser pointer-interaction and motion package | npmjs.com/package/haspr-cursor

haspr-rndb: Offline database package for React Native and Expo | npmjs.com/package/haspr-rndb

Awwwards Jury Member 2026 | awwwards.com/jury-member/abhay-rohit

Haspr portfolio: Awwwards Honorable Mention (2022), Orpetron Site of the Day (2023), CSS Winner STAR and CSS Design Awards Special Kudos (2022).

Education

Master of Technology in Computer Science: Babulal Tarabai Institute of Research and Technology, Sagar | 2021 - 2023

Bachelor of Technology in IT: Indira Gandhi Engineering College, Sagar | 2017 - 2021
